Activity 3:

Implement Playwright with TypeScript

Use Ask Mode to analyze the existing project structure and identify all impacted files required for the Playwright with TypeScript implementation.

Once the analysis is complete, switch to Agent Mode to implement the required changes

Status: Done

Playwright Code:

```
import { Page } from '@playwright/test';

export class LoginPage {
  constructor(private page: Page) {}

  async open(url: string): Promise<void> {
    await this.page.goto(url);
  }

  async fillUsername(username: string): Promise<void> {
    await this.page.fill('#username', username);
  }

  async fillPassword(password: string): Promise<void> {
    await this.page.fill('#password', password);
  }

  async clickLogin(): Promise<void> {
    await this.page.click('input[type="submit"][value="Login"]');
  }

  async login(username: string, password: string): Promise<void> {
    await this.fillUsername(username);
    await this.fillPassword(password);
    await this.clickLogin();
  }
}
```
