

Promptathon - ICEPOT Prompt Makeover Challenge

Final Submission - Scenario 1: LinkedIn Resume Upload

Original Weak Prompt

Generate test cases for file upload.

What I Feel is Missing

- Application name
- File type
- Minimum and maximum file size
- Multiple file upload behavior
- Handling oversized files
- Handling suspicious/malicious files
- User roles and access
- Expected success/failure behavior

ICEPOT - Instruction (I)

Generate comprehensive positive, negative, edge, security, and non-functional test cases for the LinkedIn Resume Upload functionality for both registered premium and non-premium users.

ICEPOT - Context (C)

The application is LinkedIn. Registered users can upload their resume. The supported file format is PDF. The maximum allowed file size is 5 MB. Only one file can be uploaded at a time. The system should reject empty, corrupted, malicious, or unsupported files and display a success toast message after a successful upload.

ICEPOT - Example (E)

TC_001

Test Description: Verify that a registered user can upload a valid PDF resume equal to or less than 5 MB.

Test Data: Resume.pdf (4 MB)

Expected Result: The resume should be uploaded successfully, and a success toast message should be displayed.

ICEPOT - Persona (P)

Act as a Senior Automation Test Engineer with 8+ years of experience specializing in web application testing and test case design.

ICEPOT - Output Format (O)

| Test Case ID | Test Description | Test Data | Expected Steps | Actual Test Results | Status | Comments |

ICEPOT - Tone (T)

Professional

Final Improved Prompt

Persona:

Act as a Senior Automation Test Engineer with 8+ years of experience specializing in web application testing and test case design.

Context:

The application is LinkedIn. Registered users can upload their resume. The supported file format is PDF. The maximum allowed file size is 5 MB. Only one file can be uploaded at a time. The system should reject empty, corrupted, malicious, or unsupported files and display a success toast message after a successful upload.

Instruction:

Generate comprehensive positive, negative, edge, security, and non-functional test cases for the LinkedIn Resume Upload functionality for both registered premium and non-premium users.

Example:

TC_001 - Verify that a registered user can upload a valid PDF resume equal to or less than 5 MB. Test Data: Resume.pdf (4 MB). Expected Result: The resume should be uploaded successfully, and a success toast message should be displayed.

Output Format:

| Test Case ID | Test Description | Test Data | Expected Steps | Actual Test Results | Status | Comments |

Tone: Professional

Why This Prompt Is Better

- Provides complete context.
- Clearly defines the expected task.
- Includes a sample to guide AI output.
- Assigns an expert QA persona.
- Specifies the required output format.
- Defines a professional tone for consistent, high-quality results.
